

# ISEC7 Managed Services

For Enterprise Mobility

## ABOUT THE ISEC7 GROUP

The ISEC7 Group is a **global provider of digital workplace and enterprise mobility services** and solutions. The company was one of the first movers in mobilizing company and business processes. Today, the group has numerous renowned companies and governmental organizations as committed customers.

The company continually invests in the evaluation and development of new technologies. ISEC7 solutions include ISEC7 SPHERE, which enables organizations to manage and monitor their entire digital workplace infrastructure from one web-based, central console, and ISEC7 MAIL, a secure mobile email client allowing classification, encryption and signing enforcement.

## ISEC7 MOBILE MANAGED SERVICES

The success of your global operations depends on the efficiency of your mobile IT operations. As your mobile managed services provider, ISEC7 advises on short- and long-term requirements for optimization as part of our support agreements. We are on the lookout for needed refinements to optimize your mobile strategy, business process mobilization and mobile security while we engage tactically to keep daily operations running without interruptions. As an extension of your existing team, we identify the potential risks that might interfere with your enterprise goals to reduce costs and produce an unmatched mobile user experience. **ISEC7 Mobile Managed Service** offerings are packaged, yet flexible, to map to the unique requirements of the client environment. ISEC7's mobility experts and engineers work with your team to incorporate strategic goals and understand which resources and tools fit into the larger picture of your organization's mission.

ISEC7's Engineering Team takes away the headache of securing and monitoring a mobile enterprise allowing clients to direct focus on more pressing matters. Essentially, ISEC7 becomes your mobile IT department for anything mobile, including mobile device management (MDMD) operations, monitoring, migrations, configurations, applications, infrastructure, network, policy – from operations to the end user. Benefits to teaming with ISEC7, include:

### **Flexible Support Options or 24/7**

Dedicated mobile experts for device management and operational guidance

### **Cost-Effective**

Decreased time, labor and overall costs

### **Secure**

Monitoring for changes in performance and proactive measures addressing potential risks

### **Low to No Technical Interruptions**

Behind the scenes monitoring and management eliminates downtime and improves productivity

### **Mobile IT Excellence**

Positive mobile user experience and operational access to information they need

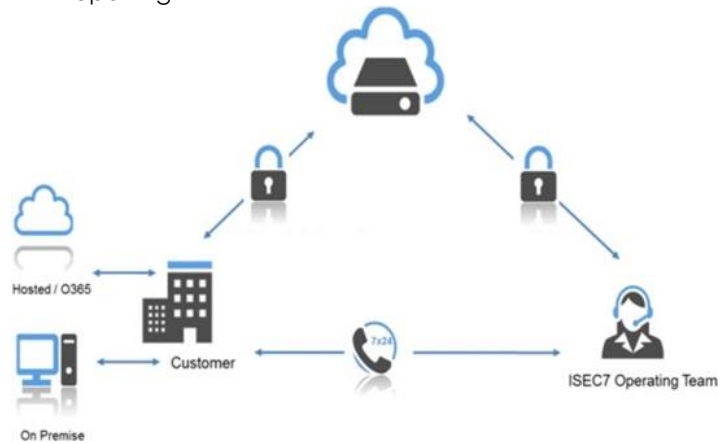

### **Control and Peace of Mind**

Complete and comprehensive control of your mobile environment

## APPROACH

At the core of our managed services is the proprietary architecture of ISEC7 EMM Suite, which captures insights about the health and status of legacy and new systems throughout the migration process. In addition, our mobility experts use the ISEC7 EMM Suite solution to optimally navigate through the migration, analyze flows and provide proactive guidance.

- Device management
- MDM devices and users
- Mobile application management
- Mobile security management
- Roll-out policies, settings and software
- Reporting

## FULL LIFE CYCLE SUPPORT

For over 15 years, ISEC7 has designed solutions for greater efficiency and quality. Our services are no different and provide a clear, positive impact on operations. **ISEC7 Mobile Managed Services** are tailored to meet the needs of your specific enterprise. Our people and robust ecosystem knowledge serve as an extension of your team, strategically and tactically. In turn, teams benefit from reduced costs, operational confidence and an optimal mobile user experience.
